

Replacing Bypass Lift Guide: Fireview 205

Please read all the instructions before you begin the procedure. Confirm that you have all the necessary tools and parts. If you have any questions technical support is available toll free at 1-800-866-4344, Monday – Saturday 9 a.m.- 5 p.m. ET

Tools Needed:

-
- ½” wrench
- ½” socket
- WD-40, Kroil, PB Blaster, or similar penetrant

Materials:

- W-178 Fireview lift guide
 - (2) 5/16”-18 x 1” bolts
 - anti seize compound
1. Make sure the stove is cool. Remove the top lid of your Fireview.

2. Treat all hardware to be remove with penetrating liquid. Allow it to stand at least 15 minutes. Use a ½” wrench to remove the nuts that attach the u-bolt to the bypass shaft and lift guide. Remove the u-bolt. Pay attention to the direction the u-bolt was installed.

3. Remove the (2) bolts that attach the lift guide to the bypass cover with a ½” socket.

4. Install the new lift guide with the supplied bolts. Apply anti seize compound to the threads of the bolts.

5. Push the U-bolt through the new lift guide. Be sure it is installed in the proper direction. Now push the U-bolt back through the bypass shaft and fasten with the nuts.
6. Test the seal between the bypass cover and the gasket using a slip of paper. Close the bypass cover on the paper. There should be enough resistance on the paper to slightly curl it when it is pulled out. To increase pressure on the bypass door, loosen the top nut on the U-bolt, and then turn the bottom nut counter clockwise. To decrease pressure on the bypass door turn the bottom nut clockwise, and do the same to the top nut. Make small adjustments until the proper seal is reached.

7. Replace the top lid.

8. Enjoy your stove!
